

Services offered by EATRIS-ERIC

| Service/Tool Name | Description | Contact | Mode of access |
|---|---|--|---|
| PET Imaging & Tracing | Access to high-end radionuclide production and PET-imaging facilities (pre-clinical and clinical) for imaging-enabled drug development. Over 75 of the shelf tracers are available within the EATRIS network and novel tracers can be developed as needed. GMP grade for clinical use. | Martin de Kort martindekort [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| Biomarker development and validation | Validation of biomarkers in independent, high quality sample sets with associated data; assay development and optimisation. Provided technologies include next generation DNA/RNA sequencing, antibody engineering, immunoassays, mass spectrometry and multi-parametric flow cytometry. | Florence Biatrix florencebiatrix [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| Advanced screening small molecules | Wide range of screening technologies, including 3D cell cultures, liquid-overlay cultures, flowcytometry and cellular screening using X-rays. | Martin de Kort martindekort [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| GMP production of ATMP's | GMP pharmaceutical plants authorised by the local competent authorities. | David Morrow davidmorrow [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| Vaccine development | Provision of cutting edge services for the next generation of vaccines, covering the entire vaccines development pipeline, including antigen characterisation, vaccine formulation, and development of potency tests and preclinical <i>in-vivo</i> validation. | David Morrow davidmorrow [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |

| | | | |
|-------------------------------------|--|---|---|
| Clinical development support | Clinical expertise, support of trial design, identification of potential trial centres. Both for ATMP's and small molecules. | ATMP's: David Morrow davidmorrow [at] @eatris.eu Small Molecules: Martin de Kort martindekort [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| Regulatory Support | Early assessment of the requirements for successful translational projects, provision of information necessary to drive the development plan for innovative technologies and products. | Anne-Charlotte Fauvel annecharlottefauvel [at] eatris.eu www.eatris.eu | Open for funded projects and for consortium building. EATRIS itself does not provide funding. |
| Innovation Management | Support with the design of the exploitation plan of the project; definition and implementation of a monitoring plan to capture intellectual property protection needs; identification of industry partnering opportunities for co-development and/or out-licensing; follow-up financing opportunities. | Anne-Charlotte Fauvel annecharlottefauvel@eatris.eu | This service can be provided for funding applications. |
| Training | Open access online course: the landscape of translational medicine Face-to-face workshops on translational assessment or best practices for public-private collaboration. | Rosan Vegter rosanvegter@eatris.eu | This service can be provided for funding applications or on a contract basis. |
